

**A Brighter Future**  
**The Trump-Perry Energy Policy Standard**  
*What They Are Saying*

**President Donald J. Trump**

- *“Obama’s war on coal is killing American jobs, making us more energy dependent on our enemies & creating a great business disadvantage.”*
- *“I am taking historic steps to lift the restrictions on American energy, to reverse government intrusion, and to cancel job-killing regulations.”*
- *“We are going to continue to expand energy production, and we will also create more jobs infrastructure, trucking, and manufacturing.”*
- *“Together, we are going to start a new energy revolution -- one that celebrates American production on American soil. We are returning power to the states -- where that power belongs.”*

**Secretary of Energy Rick Perry**

- *“There are other countries that are making advances in clean coal technology that we historically led the world in. We need to get that edge back.”*
- *“A clean energy revolution is taking place across America.”*
- *“Having a diverse portfolio of all the energy sources, including renewables, is important to this country he said. “Picking and choosing a few that fit your political agenda is not good for America.”*
- *“Clean coal-fired power should be included in the energy mix as it is the model for what reliable clean coal technology can look like in the U.S.”*
- *“It is imperative to responsibly develop all of America’s rich energy sources in-order-to maximize the country’s tremendous economic opportunity, which will allow for America’s continued leadership in clean energy.”*
